

This issue is a simple one. XM offers a service that no other can give at this time. The product is amazing and Xm is growing more and more everyday because of this great product. Because it is a product by a business for the people it is a private thing. Reject this petition and let the people who have XM decide what type of programming they want by directly contact XM and letting them give me the people what they want and deserve for this service. Thank you for your time in hearing the peoples' voices
